MindManager & Microsoft: Working together to help you work better

The Microsoft suite of applications and services has become an essential part of the modern workplace. Most of us simply could not do our jobs or run our businesses without it.
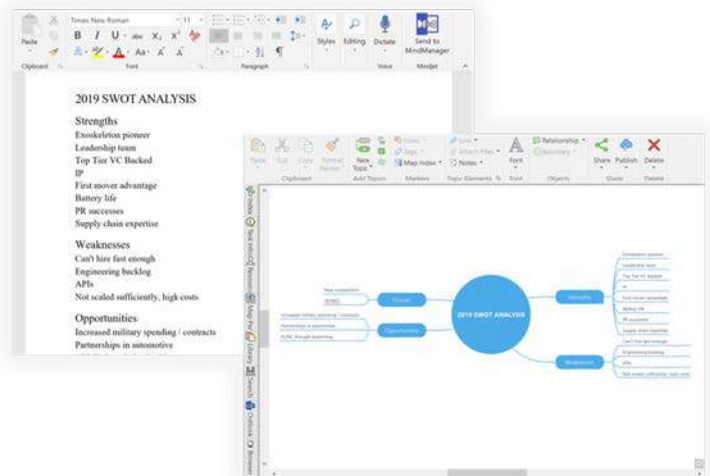

MindManager for Windows features deep native integrations with the Microsoft products you rely on every day. And as a Microsoft Gold-Certified Partner, we work closely with Microsoft to ensure those integrations are valuable, powerful and consistently reliable.

Together, MindManager and Microsoft help you see more clearly, work more efficiently, be more productive and achieve outstanding results.

Uncover your best thinking

Work with Microsoft content in a dynamic "virtual whiteboard", uncovering new ideas, connections and possibilities that can take the finished product from good to extraordinary.
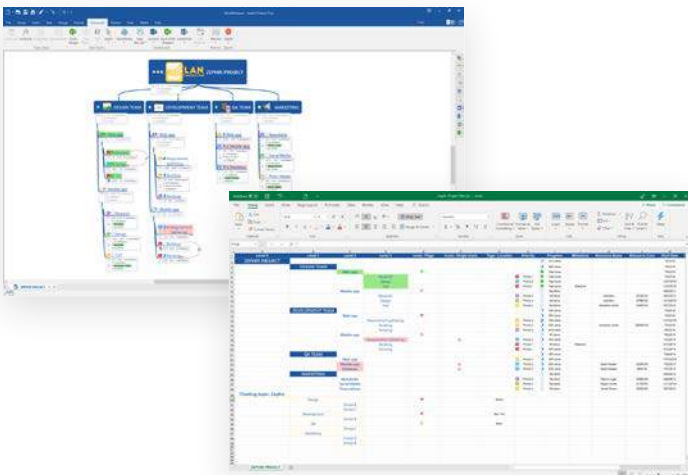

- Import Excel data, Word content, Project files and Outlook information into flexible visual maps
- Fluidly reorganize and restructure content
- More easily navigate large documents and files to find the information you need

Move seamlessly from planning to action

Maintain fluid end-to-end project continuity, without losing any time, ideas or data along the way.
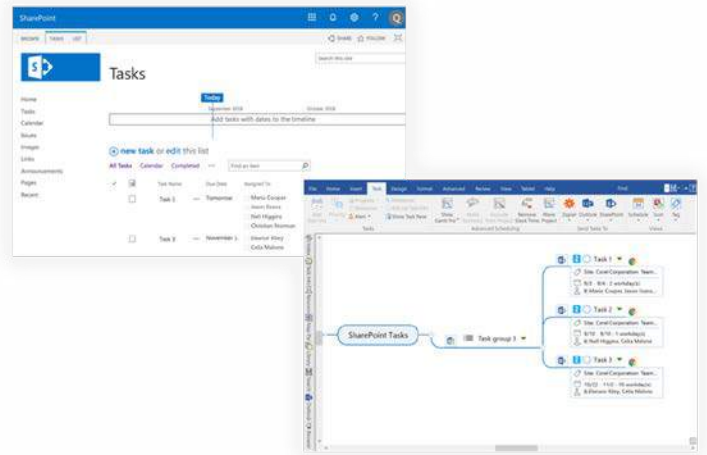

- Send map and diagram content to Word, PowerPoint, Project and Excel
- Send tasks to Outlook or SharePoint
- Effortlessly create multiple Microsoft outputs from a single MindManager map, to deliver the same information to different audiences in the way they want to see it

Bulletproof your projects by unifying your data

See, align on and tackle tasks more efficiently, without losing sight of why you're doing them in the first place.

• Synchronize Outlook, Excel and SharePoint content with MindManager maps and diagrams
• Create a customized, dynamic visual representation of your Microsoft files and folders within your maps
• Link to other related documents, content repositories, web pages, images and more from a single visual dashboard
