

MindManager® for Education

SOLUTION OVERVIEW

Enhance educational outcomes through the power of visual thinking

The human mind is optimized for visual thinking. MindManager empowers teachers and students to work, communicate, and learn more effectively with a unique set of visualization tools that bring structure and clarity to complex concepts, learning materials, curriculums, lesson plans, research projects, and more.

Easy to use and fully customizable, MindManager supports freeform thinking, fluid organization, and a holistic understanding of course material—benefitting teachers and students alike.

For Teachers: Increase engagement. Decrease prep time.

MindManager helps teachers:

- **Share learning material** in a manner that empowers independent learning
- **Structure and present** course material in a more efficient, engaging, and impactful manner
- **Boost long-term** comprehension and retention of information
- **Improve student motivation** and engagement, especially in online teaching environments
- **Plan lessons more efficiently**, reducing time spent working after hours
- **Conduct, capture and organize** research for academic papers and course creation in one place
- **Manage academic resources**, project timelines, budgeting, and forecasting
- **Track student progress**, capture notes on performance, and streamline report card creation

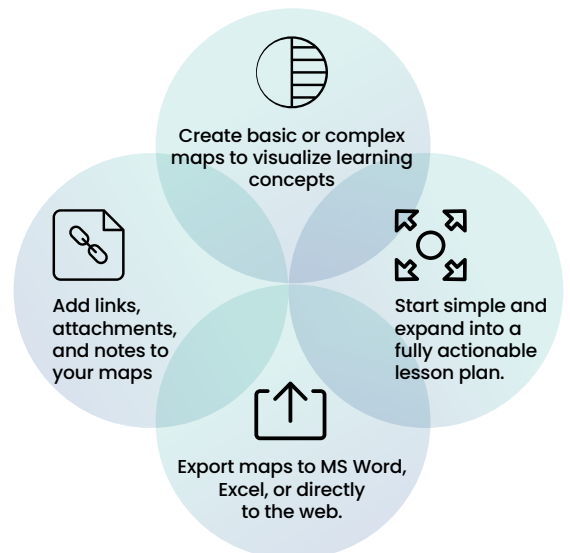

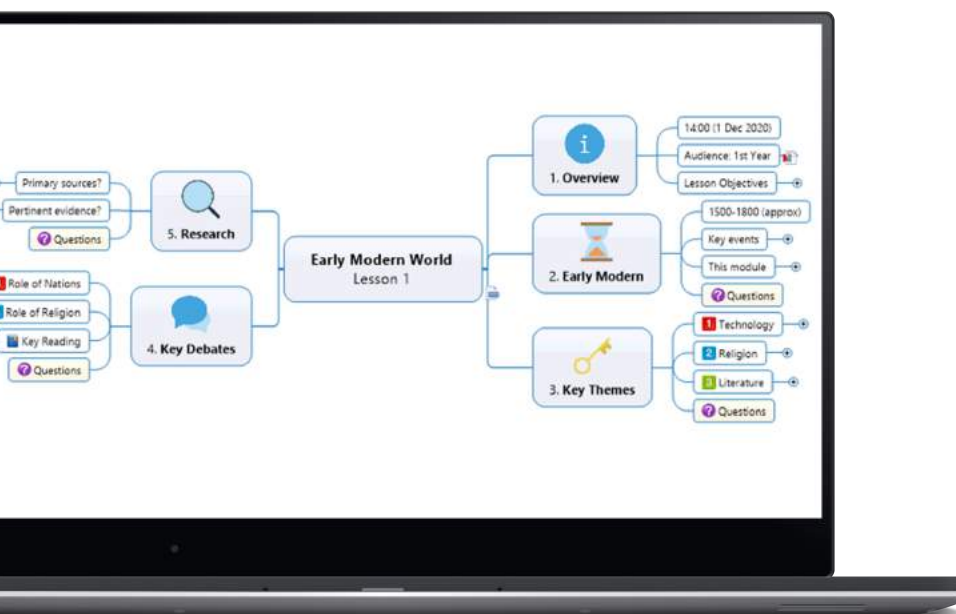

"I used MindManager to create maps and charts for my teaching curriculum. It allows me to visualize all the content I need to teach, and the time it will take me to accomplish the schedule. The visualization and structure of the information is amazing."

Nancy Mejias

Robotics Teacher, The Sagemont School

Free teachers from the information silos that obstruct efficiency.

For Students: Eliminate learning roadblocks. Improve habits and results.

MindManager helps students:

- **Take better notes** by allowing them to structure information in a way that works best for their learning style
- **Create visual connections** between concepts and course units by visually tagging and grouping complementary ideas
- **Maintain homework, assignments, and due dates** in a central place, with the ability to visually flag when an assignment was forgotten or is at risk
- **Add visual cues** to their learning material like images, colours, and icons to highlight key concepts
- **Organize their thoughts** more effectively, helping to improve study efficiency and writing structure
- **Research more efficiently** by organizing findings into topics and subtopics, and using attachment and links to centralize information
- **Boost long-term information retention** by enabling deep understanding and active learning
- **Overcome learning disabilities** like dyslexia and dysgraphia by enabling them to choose the most effective manner by which to structure and work with learning material

"After using MindManager, my students have started to become much more interested in the subject matter and participate much more in class. The grades on the unit tests after starting to use MindManager have been really good. They've increased drastically."

Sutarto Sutarto
Physics Teacher, Bunda Mulia School

Empower students to learn in the way that works best for them.

Add visual cues, restructure and rearrange information as you see fit.

Link media files to your maps for richer information.

A hands-on approach to structuring assignments and course material.

Teachers and students will love the flexibility and efficiency of working and learning visually. Try MindManager for free today. Visit the URL below to get started or [contact us](#) to learn more about special pricing for educational organizations.
