

MindManager®

What's New in MindManager 12 for Mac

See your work in a whole new light

With a powerhouse collection of new features and functions, MindManager 12 for Mac puts next-level mind mapping and data visualization at your fingertips. See your mission-critical information the way you need to, work with it the way you want to, understand it better and get more done with it - faster than ever before.

SmartRules™

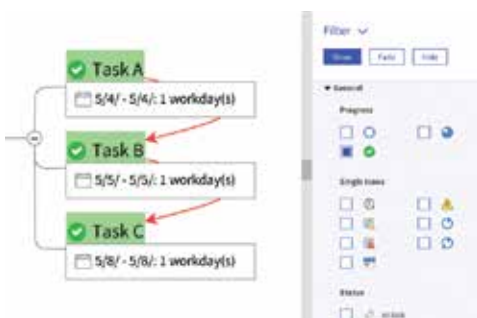

Transform maps from simply representing workflows, to driving and accelerating them.

- Write rules that change topic icons, tags, properties, progress & priority markers
- Apply SmartRules to individual objects or topics, select branches or full diagrams
- Ignite productivity by automating updates to task lists, project plans, flowcharts and more

Objects & Smart Shapes

Bring greater clarity to complex information.

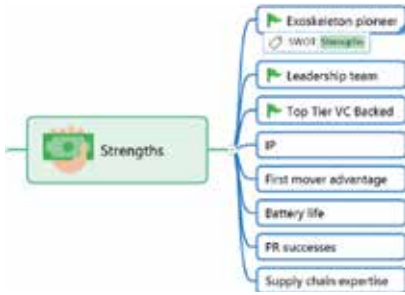

- Enrich, clarify and expand map content with 12 new shapes including stars, arrows, brackets, funnels and many others
- Easily group content within shapes to define processes, illustrate concepts and more
- Create custom diagrams quickly and easily with new smart funnels & matrices

HTML5 Export & Publish Filtering

Make shared maps easier for people to navigate, understand and respond to.

- Filter exported & published maps on icons, tags and resources
- Create direct topic links to visually guide recipients to the content you want them to see
- Move projects and conversations forward faster

Match Width

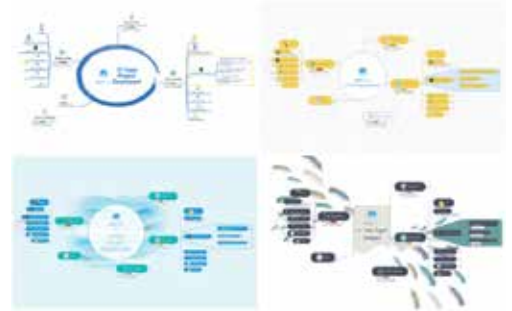

Keep your audience focused on your map's content, not its structure.

- Standardize topic width to create more readable & engaging presentations
- Adjust topic width manually or with a single click
- Apply changes to individual topics or entire maps

Theme Designs

Instantly convey subtle yet significant messages about your brand, style, and content.

- Choose from 40+ stunning and varied new visual themes
- Transform any map's look, feel and tone with a single click
- Effortlessly switch themes to engage different audiences and support different goals

Dark Mode Support

Map in the mode that works best for you

- Enjoy a MindManager experience seamlessly adapted to Mojave Dark Mode
- Optimized menus and icons keep map content the center of attention
- Automatically-adjusting mode can also be changed manually in Mac settings

Touch Bar Support

Put greater control within your reach

- Context-specific menus automatically surface the appropriate options for the most popular MindManager commands
- Predictive text saves typing time and speeds map building
- Add themes, export files and much more with a single touch

PLUS

Expanded Icon Library

Add vast amounts of visual data with 500+ new & enhanced icons

Enhanced Menu Design

Work more efficiently with our clearer, more user-friendly menu

XMind & FreeMind Imports

Evolve and improve on content created in other mapping applications
