

# MindManager®

## What's New in MindManager 2019 for Windows

### Transcend the limits on what you can see, create, communicate and achieve

The most robust, customizable information visualization software available, MindManager 2019 for Windows empowers you to uncover hidden possibilities, unite information and people, and unleash productivity to do great work faster than ever.

#### SmartRules™

Transform maps from simply representing workflows, to driving and accelerating them.

- Write rules that change topic icons, tags, properties, progress & priority markers
- Apply SmartRules to individual objects or topics, select branches or full diagrams
- Ignite productivity by automating updates to task lists, project plans, flowcharts and more

#### Objects & Smart Shapes

Bring greater clarity to complex information.

- Enrich, clarify and expand map content with 12 new shapes including stars, arrows, brackets, funnels and many others
- Easily group content within shapes to define processes, illustrate concepts and more
- Create custom diagrams quickly and easily with new smart funnels & matrices

#### Tag View

Gain a clear picture of a project's overall progress towards completion.

- See and update the status of tasks & action items in progressive Kanban-style columns
- Instantly identify backlogs, bottlenecks and resource issues
- Define processes with custom column tags that are automatically applied in Map View

#### Icon View

More easily see and show the exact information you need, the moment you need it.

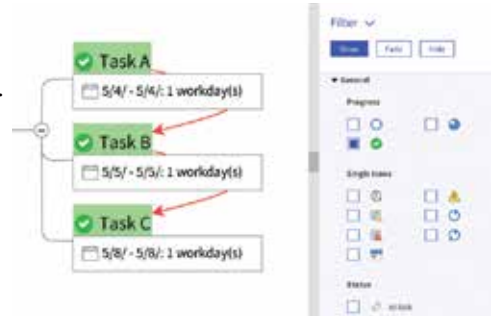

- View content by any applied icon, including Priority, Progress and 500+ others
- Assign icons to topics within Icon View via simple drag & drop
- Update and manage topics more quickly, easily & logically in all views

## HTML5 Export & Publish Filtering

Make shared maps easier for people to navigate, understand and respond to.

- Filter exported & published maps on icons, tags, resources and saved Power Filter queries
- Create direct topic links to visually guide recipients to the content you want them to see
- Move projects and conversations forward faster

## Match Width

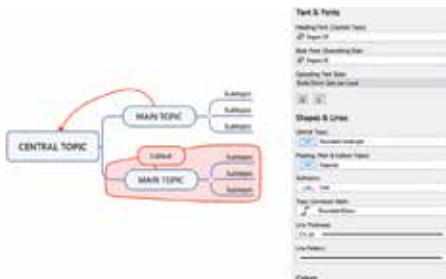

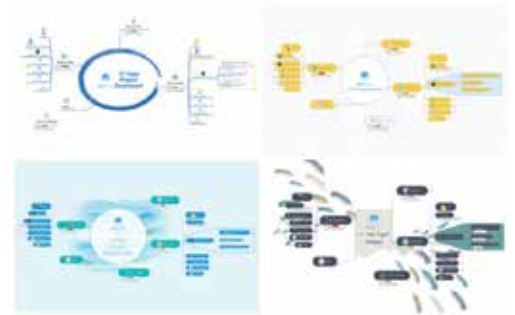

Keep your audience focused on your map's content, not its structure.

- Standardize topic width to create more readable & engaging presentations
- Adjust topic width manually or with a single click
- Apply changes to individual topics or entire maps

## Theme Designs

Instantly convey subtle yet significant messages about your brand, style, and content.

- Choose from 40+ stunning and varied new visual themes
- Transform any map's look, feel and tone with a single click
- Effortlessly switch themes to engage different audiences and support different goals

## Easy Theme Editor

Fine-tune any map's look to say exactly what you want it to with just a few simple clicks.

- Easily adjust topic text, fonts, shapes, lines, colors and more
- Change a map's visual theme without changing its structure
- Create highly customized visualizations aligned with your brand, content, and vision

# PLUS

### Expanded Icon Library

Add vast amounts of visual data with 500+ new & enhanced icons

### Enhanced Menu Design

Work more efficiently with our clearer, more user-friendly menu

### XMind & FreeMind Imports

Evolve and improve on content created in other mapping applications
